

DAILY INTERIOR COLD STRESS LOG

Complete at the start of each shift when interior ambient temperature is $\leq 60^{\circ}\text{F}$ in any active finish area.
Retain with project safety records for at least three (3) years.

Date	
Project/Area	
Shift Start/End	
Building Enclosure Status	☐ A ☐ B ☐ C ☐ D
Interior Air Temperature at 5 ft. ($^{\circ}\text{F}$)	_____ $^{\circ}\text{F}$
Floor Level Temperature ($^{\circ}\text{F}$)	_____ $^{\circ}\text{F}$
Relative Humidity (%)	_____ %
Perceptible Draft?	☐ Yes ☐ No Source: _____
Effective Interior Temperature ($^{\circ}\text{F}$)	_____ $^{\circ}\text{F}$
Action Level	
Work/Warm-Up Schedule Applied	
Heater Type(s) in Use	
CO Reading at Heater/Warming Area (ppm)	
Warming Area Temperature ($^{\circ}\text{F}$)	_____ $^{\circ}\text{F}$
Workers On Site (Count)	
Workers in Acclimatization (Names)	
PPE Spot Check Completed	☐ Yes ☐ No Initials: _____
Notable Observations	
Cold-Stress of CO Incidents/Near Misses	
Superintendent Signature
