

JOB HAZARD ANALYSIS WORKSHEET (R131-24AP §5)

This Job Hazard Analysis Worksheet is to be completed once before a job classification's tasks are first undertaken at a project and reviewed/revised when a task materially changes (R131-24AP §5) or after any accident (NAC 618.540). This JHA Worksheet should be retained in the project file. Allegheny Millwork's standing JHA findings for Divisions 06, 08, and 10 are summarized on page 6 of this plan; this worksheet supplements that with project-specific conditions.

Project Name			
Project Address			
Date JHA Performed		Performed By	

1. Job Classifications with Heat-Illness Exposure >30 mins/hour [R131-24AP §5(2)(a)]

--

2. Tasks & Procedures Performed by Those Classifications [R131-24AP §5(2)(b)]

--

3. Working Conditions Creating Heat-Illness Exposure [R131-24AP §4]

--

4. Engineering Controls to be Implemented

--

5. Administrative & Work Practice Controls to be Implemented

--

6. Personal Protective Equipment Considerations

--

7. Acclimatization & Health-Risk Communication

--

8. General Superintendent and Superintendent/Competent Person for This Project

General Superintendent	
Superintendent/Competent Person	

9. Review & Revision Triggers:

- Material Change to a Task (R131-24AP §5)
- Following an Accident (NAC 618.540)
- Identification of a New Heat Hazard
- Annual Review (April 1st)
