

WRITTEN EXPOSURE CONTROL PLAN (ECP) TEMPLATE

This project specific template is to be filled out by the Superintendent/Competent Person prior to Allegheny Millwork employees, subcontractors and/or installers arriving on site where employee exposure to Respirable Crystalline Silica is expected at or above the Action Level of 25 $\mu\text{g}/\text{m}^3$, calculated as an 8-Hour TWA.

Project Number/Name:	
Jobsite Address:	
General Contractor:	
Prepared By:	
Date Prepared:	
Superintendent:	
Installation Dates:	Anticipated Start Date: _____ Anticipated End Date: _____

1. Covered Field Tasks & Materials:

#	Field Task	Material(s)	Est. Duration/ Shift	Table 1 Task No. (If Applicable)	Indoor or Outdoor
1					
2					
3					
4					
5					
6					

2. Engineering Controls, Work Practices & Respiratory Protection for Each Task:

Task #	Engineering Controls	Work Practices	Respiratory Protection
1			
2			
3			
4			
5			
6			

3. Jobsite Housekeeping Measures:

Describe how silica containing dust will be cleaned up on the jobsite, including the use of HEPA vacuums, wet methods, containment of slurry and prohibitions on dry sweeping & compressed air:

4. Procedures to Restrict Access to Work Areas:

Describe how access will be controlled during high exposure tasks, including signage, barriers, containment & coordination with other trades through the General Contractor & Scheduling:

5. Procedures to Restrict Access to Work Areas:

Describe coordination with the General Contractor and other trades regarding silica generating work (concrete cutting, core drilling, masonry, tile cutting, drywall sanding, demolition, etc.) that may occur in the same area as Allegheny Millwork installation activities:

6. Superintendent/Competent Person Inspections:

The designated Superintendent/Competent Person shall conduct frequent and regular inspections of materials, tools, equipment, work practices and adjacent trade activities, and shall take prompt corrective action to address any deficiencies. Inspection frequency for this project shall be at least:

- At the start of each shift and at the start of each covered field task
- After any change in personnel, materials, tools or controls
- Following any reported dust-control failure or exposure incident
- Whenever other trades begin silica generating work in proximity to Allegheny Millwork employees, subcontractors or installers.

7. Review and Update:

This ECP shall be reviewed at least annually, at the completion of the project or whenever jobsite conditions change materially, whichever is sooner.

8. Approvals:
