

## TOOLBOX TALK — WEEKLY SAFETY MEETING

Millwork | Carpentry | Interior Finishes | Material Handling

### WEEK 52

Date:  Supervisor:

Project / Job Name:

### TOPIC: Annual Safety Review: Lessons Learned This Year

#### OVERVIEW:

The final toolbox talk of the year is an opportunity to step back from individual tasks and look at safety performance, lessons, and improvement across the full year of work. Effective safety programs are not static — they evolve based on what actually happened, what nearly happened, and what changed in

#### TALKING POINTS — Read to Crew:

1. Take a few minutes to think back through this year's work. What hazards did you encounter that surprised you? What conditions were more dangerous than expected? What procedures or practices worked well, and which ones got skipped under time pressure? These observations — from the workers who were actually doing the job — are the most valuable input into next year's safety planning.
2. Review the near-miss and incident log from this year as a crew. How many incidents were there? What types of injuries occurred? What tasks or operations were involved? Looking at the pattern of events over a full year reveals trends that are not visible in any individual event. If three incidents this year involved the same tool or the same type of task, that is the most important
3. Acknowledge the crew members who contributed to a safe work year. Safety performance is not just the absence of injuries — it is the daily discipline of doing things right, speaking up about hazards, helping coworkers with proper technique, and reporting near misses. Everyone who worked all year without a recordable injury did something right, and that deserves recognition. A safety
4. Set specific safety improvement goals for next year based on this year's lessons. Vague goals like 'be safer' accomplish nothing. Specific goals — 'reduce miter saw near-misses by implementing a mandatory two-hand rule,' 'complete 100% of toolbox talks with crew participation,' 'achieve zero lost-time injuries' — create accountability and focus. Write them down, communicate them to the

#### DISCUSSION QUESTIONS — Ask Your Crew:

Q1: What is the most important safety lesson you personally learned this year?

Q2: What one change to our safety program or work practices would make the biggest difference next year?

#### KEY SAFETY POINTS:

- Review the near miss and incident log from the full past year as a team
- Recognize crew members who contributed to a safe work year
- Identify the top 3 recurring hazards from this year and plan specific controls
- Update the toolbox talk schedule based on which hazards appeared most
- Every person who goes home healthy every day is the measure of success

*Crew sign-in sheet on page 2 — all 30 crew members sign on the following page.*

# CREW SIGN-IN SHEET

WEEK 52

By signing, I confirm I attended this toolbox talk and understand the topic discussed.
